

Improved JIRA Diff

Description

The Improved JIRA Diff plugin creates a new visual and colorful changelog for tickets.

New benefits for users

Instead of the standard before-after display the user gets a single column solution, which shows the changes of the ticket in a visually appealing way. Newly added text will be marked green, while removed passages will be crossed out and marked red. To keep the amount of shown text after small changes low, the history will only display some lines before and after a change.

View of the history with the Improved JIRA Diff
